CONTENTS OF VOLUME 16

Number 1, September 1974

Francis H. Harlow and Anthony A. Amsden. Multifluid Flow Calculations at All Mach Numbers 1

H. H. Jaffé and R. L. Ellis. A Treatment of Symmetry in MO Calculations 20

Robert K.-C. Chan. A Discretized Solution for the Solitary Wave . . . 32

D. W. Hewett. Numerical Simulation of a Radially Inhomogeneous Cylindrical Plasma 49

W. P. Latham and Rogers W. Redding. On the Calculation of the Parabolic Cylinder Functions 66

G. Janin and M. J. Haggerty. Numerical Experiments on Expanding Gravitational Systems 76

Number 2, October 1974

R. J. Uncles. Numerical Approximation of the Equations Describing a Partially Ionized Plasma 93

John W. White. A New Form of Artificial Viscosity for Elastic Solids . . 119

Roland Maria-Sube. Numerical Solution to Free Surface Axisymmetric Rotational Flows 127

F. Y. Hajj, H. Kobeisse, and N. R. Nassif. On the Numerical Solution of Schroedinger's Radial Equation 150

Robert D. Cowan and Joseph B. Mann. Stabilization of Solution of the Hartree-Fock Equations 160

L. L. Boyer. Computerized Group Theory for Lattice Dynamical Problems 167

Note

R. Van Dooren. Stabilization of Cowell's Classical Finite Difference Method for Numerical Integration 186

Announcement 193

Number 3, November 1974

M-S. Chen and R. F. Peierls. A Mapping Technique for Efficient Random Event Generation with Constraints 195

M. H. Houston, Jr., and J. Cl. de Bremaecker. ADI Solution of Free Convection in a Variable Viscosity Fluid 221

GILBERT H. HOFFMAN. Extension of Perturbation Series by Computer: Viscous Flow between Two Infinite Rotating Disks 240

J. K. CAYFORD, W. R. FIMPLE, D. G. UNGER, AND S. P. WHITE. A Finite-Difference Newton-Raphson Solution of the Two-Center Electronic Schrödinger Equation 259

V. E. DENNY AND R. M. CLEVER. Comparisons of Galerkin and Finite Difference Methods for Solving Highly Nonlinear Thermally Driven Flows 271

S. M. ROBERTS AND J. S. SHIPMAN. An Iteration Perturbation Technique . 285

NOTES

JOHN M. GARY. On the Optimal Time Step and Computational Efficiency of Difference Schemes for PDE 298

RICHARD S. HIRSH AND DAVID H. RUDY. The Role of Diagonal Dominance and Cell Reynolds Number in Implicit Difference Methods for Fluid Mechanics Problems 304

LETTER TO THE EDITORS 311

NUMBER 4, DECEMBER 1974

CHARLES G. SPEZIALE AND ROBERT P. KIRCHNER. On the Use of the Method of Quadrature by Differentiation for Solving Eigenvalue Problems in Hydrodynamic Stability 315

J. A. FLECK, JR. A Cubic Spline Method for Solving the Wave Equation of Nonlinear Optics 324

J. W. EASTWOOD AND R. W. HOCKNEY. Shaping the Force Law in Two-Dimensional Particle-Mesh Models 342

B. E. MCDONALD. Numerical Calculation of Nonunique Solutions of a Two-Dimensional Sinh-Poisson Equation 360

H. COHEN AND J. ICKOVIC. Numerical Treatment of Singular Integral Equations 371

DENNIS C. JESPERSEN. Arakawa's Method Is a Finite-Element Method . . 383

NOTE

STEPHEN T. ELBERT AND ERNEST R. DAVIDSON. Evaluation of Electron Repulsion Integrals over Gaussian Lobe Basis Functions 391

LETTER TO THE EDITORS

KIN-CHUE NG. On the Accuracy of Numerical Fourier Transforms . 396

AUTHOR INDEX 401
